Portable Unit (PU-GY,GN,CB)

The Portable Unit is designed for easy use while traveling, at work, or home use. It is a great way to eliminate excessive plastic bottled water, and can be used to structure low quality /stagnant bottled water. Simply pour fluid into the funnel. The ionization effect rapidly occurs and may be repeated for best results. Its performance on juices, coffee, tea, sports drinks, and wines is exceptional. Do not pour carbonated drinks through the Unit. Add a small amount of water from the Unit to the carbonated beverage to experiment with the effect. In bio-dynamics and other fields of study, directly interacting with the water during the revitalization process may have a significant effect.

When using water protocols and therapies, many people gently shake the unit while plugging both ends. Do not shake violently, as it is far less effective. Many people also use multiple passes through the unit. UV spectroscopy readings show little change after 6-9 passes. The colored Units are light filters specified to the same Roscoline color filters Darius Dinshaw used. In the same manner, the Unit may be used to program water from any white light while pouring water through it. Dinshaw was very successful with light therapy and treating many conditions successfully. See the book "Let There Be Light" by Darius Dinshaw for more details.

SPECIFICATIONS:

Max Continuous Temperature: 140F

Material Construction: Food Grade ABS body and HDPE Flow

***Do not pour boiling water through the Unit, allow to cool**

Clean by rinsing thoroughly. The Unit is dishwasher friendly, or soak in detergent and water. Some people prefer baking soda and vinegar. Rinse thoroughly by soaking or flushing after cleaning.

"We need no science of formulae, but a science of forms"

The Art of Water

Water Dedication

Viktor Schauburger dedicated his life to observing Nature, which is technically the definition of science. He pointed out the major blunder of modern physics, by introducing the missing elements. Implosion and integrative forces. The science that puts things together, rather than focusing all its observation by taking things apart. Though both principles exist in Nature, it is obvious that the integrative forces always outweigh dis-integrative forces, otherwise life and matter would not exist.

He dedicated his life to observing water and the environment and made many predictions and scientific observations that riddled institution. His developments belied only simple machines and methods which relied on fluid motion and materials.

He noted that the way we moved water, under pressure forces in straight lines would inherently destroy the life force in water and lead to massive societal decay. He was aware of the healing properties of healthy mountain streams and understood the mechanisms in which they were destroyed. He coined the term "Understand and Copy Nature", and like Steiner and others, set forth a sacred pathway and the art of bio-mimicry.

Nearly 100 years later, albeit lazy to respond, science is just beginning to uncover the basics. Other dedicated men and women, like Andreas Schultz have implemented simplified methods of understanding water and its energetic properties. Author of *the book Water Crystals -(Making the Quality of Water Visible)*

Like these individuals, we have found great strides in revitalizing water so every human being, animal, and plant can experience closer energetics to that which is rare or inaccessible for most. Water revitalizing through structuring devices and natural mineral additives provide a simple and effective means to achieve the natural and original power of the mature mountain stream.
